EDUCATION

Bachelor of Cybersecurity, Bachelor of Criminology

University of Technology, Sydney

2024 - Present

I am pursuing a Bachelor of Cybersecurity and the Bachelor of Criminology at the University of Technology, Sydney covering subjects spanning the Legal and IT industries.

HSC

Australian International Academy

2022 - 2023

HSC was the final year of my secondary education, and was the toughest year in my educational experience which I overcame with determination and hardwork.

LANGUAGES

English 

Arabic 

PROFILE

I am a motivated and responsible Cybersecurity and Criminology student with strong organisational and teamwork skills. I pride myself on being adaptable, reliable, and able to work effectively in fast-paced environments experiences in various industries. Alongside my studies, I am passionate about cybersecurity, technology, and continuous learning. In my spare time, I enjoy sports such as boxing and weightlifting, and I take an active interest in history, geography, languages, and religion. These interests help me maintain discipline, critical thinking, and a strong work ethic.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, HTML, CSS
- **Systems:** Windows (7, 10, 11), Macintosh, Linux (Red Hat, Fedora)
- **Software:** VMware, VirtualBox, Wireshark, Toolkits (various kits), MS Office 365, Filmora, OBS

CERTIFICATIONS

Google Professional Cybersecurity Certificate - Google

- Completed the Google Cybersecurity Professional Certificate, gaining hands-on experience with tools like SIEM, SQL, Linux, and Python for threat detection and incident response.
- Learned key cybersecurity concepts including risk management, network security, and security operations, aligned with industry best practices.
- Developed practical skills through real-world projects simulating tasks of an entry-level cybersecurity analyst.

CompTIA Security+ Certification - (In Progress)

- Earning the CompTIA Security+ certification would validate knowledge of core cybersecurity concepts including threat management, cryptography, and secure network design.
- Currently helping me gain proficiency in incident response, access control, and governance within enterprise and hybrid environments.

PROJECTS

Home Lab

- Building Personal PC from scratch
- Installed Ubuntu OS through VirtualBox (used to practise Linux and experiment)
- Set up routers within the house
- Setting up DNS server
- Set up a Home NAS; Used as a home Cloud and to host VMs

Microsoft Defender and Firewall - Microsoft

- Configuring and Updating Microsoft Defender
- Enabling and Configuring Microsoft Firewall

HacktheBox - TryHackMe

- These two online platforms provide me with hands-on labs and real-world cybersecurity challenges.
- Focused on penetration testing, ethical hacking, and defensive security skills.
- Allow me to practice problem-solving in simulated environments that reflect real cyber threats.
- Helped me build knowledge in vulnerability assessment, privilege escalation, and network security.
